

Boiron Influenzinum Flu Prevention Program

This homeopathic preparation is prepared every fall to contain the flu vaccine of that year in homeopathic form. A dosage of the remedy is taken once per week for 5 weeks once every fall to prevent the flu. It can be taken in place of or in addition to the flu vaccine for those who choose to. The 5 vials can be shared with the entire family as there are at least 6 doses per vial. These are available during the month of October and can be taken as late as the following February to prevent the flu.
