

Vitamin formula

Vitamin E⁸

We would like to apologise for the vitamin E back orders. It has been trying to find a superior quality vitamin E that meets the criteria of New Roots Herbal. Finally, we have sourced a vitamin E that will be the most comprehensive vitamin E ever! Most vitamin E products contain only d'alpha tocopherol and often the synthetic form. There is much more to vitamin E than d'alpha tocopherol. There are eight compounds that make up the vitamin E family. Our foods contain all eight compounds and this is the form our bodies have been processing since the beginning of our time.

New Roots Vitamin E⁸ contains all eight members of the vitamin E family - four tocopherols and four tocotrienols - extracted from vegetable oils that are present in their natural, fully active unesterified form. The eight members of the vitamin E family have some functions that are similar and other functions that are completely different. Also where they go in our body is different especially for alpha tocopherol versus the others. This is because our body has a mechanism to tell alpha tocopherol from the others. These vitamin E compounds are antioxidants and serve to trap free radicals that can damage cell membranes, protein, and DNA. Vitamin E also has other functions completely unrelated to its role as an antioxidant. Each member of the vitamin E family, has its own unique benefits. Gamma tocopherol, for example, has a greater ability to detoxify nitrogen radicals that are associated with neurological disease, inflammation, and prostate cancer. Scientists are finding that tocotrienols slow down a liver enzyme that plays a key role in the synthesis of cholesterol, where tocopherols have no such effect. A clinical study on humans indicated that a mixture of tocopherols and tocotrienols not only slowed down the narrowing of carotid arteries but also reversed the condition in forty percent of the cases.

Each Vitamin E⁸ softgel contains:

Vitamin E (d-alpha tocopherol)	400 I.U.
Beta Tocopherols	14.4 mg
Gamma Tocopherols	14.8 mg
Delta Tocopherols	1.5 mg
D'Alpha Tocotrienols	1.43 mg
Beta Tocotrienols	116 mcg
Gamma Tocotrienols	1.21 mg
Delta Tocotrienols	410 mcg
Squalenes	45 mg
Sterols (Immune modulator)	20 mg
(Containing 13mg of Beta-Sitosterols)	
Certified Organic Sunflower Oil	125 mg

In a shell of gelatin, glycerin and purified water.

So there you have it, a complete whole spectrum vitamin E with the added value of sterols, beta-sitosterols and squalenes. The price of this new formula will remain the same with exception to the quantity in each bottle. New Roots Vitamin E⁸ is available in 400 I.U. and 200 I.U. The 400 I.U. comes in 60 softgels and 120 softgels and the 200 I.U. comes in 90 softgels. For more information on Vitamin E⁸, please do not hesitate to contact Gerry or Celine at the order desk.
